Professional Summary

Experienced React developer skilled in building responsive applications using React.js, TypeScript, and Material UI. Proficient in leveraging modern libraries such as React Hook Form, Redux and Zustand to create efficient and user-friendly interfaces.

Technical Skills

Programming Languages : C programming, C++, Java

Frontend: Html, Css, Javascript, Bootstrap, ReactJs, typescript, Material UI, Tailwindcss, Redux

Backend : NodeJs, ExpressJs

Database : MongoDB

Experience

React Developer at KarmaTech AI

(Feb 2025 - present)

- Developed a project management web application with a robust Work Breakdown Structure (WBS) interface, reducing project planning time by more than 70%.
- Introduced hierarchical multi-level WBS design with dropdown menus for data entry, cutting planning effort by 70%-80% compared to legacy manual copy-pasting.
- Implemented a 3-step WBS approval workflow, enabling structured reviews and compliance beyond Excel-based processes, improving project control efficiency.
- Created a dynamic Job Start form module to auto-calculate profit margins from WBS data, boosting contract accuracy and financial forecasting by 80%.
- Engineered an automated Monthly Progress Report generation system in Excel, accelerating the reporting process by 100% through elimination of manual efforts and streamlining client communications.

Projects

Notes Website (React.js, Tailwind CSS, Express.js, MongoDB)

- Built a mobile responsive notes application supporting seamless use across desktop and mobile devices.
- Implemented JSON Web Token (JWT) based authentication, storing tokens in cookies for secure session management.
- Designed and implemented a CRUD functionality enabling users to add, edit, delete, and pin notes, improving data management using MongoDB.

Image Upload to Cloudinary (React.js, Tailwind CSS, Express.js, MongoDB)

- Integrated Cloudinary API to upload and retrieve images up to 10MB, generating optimized sharable URLs.
- Streamlined image storage for web projects by enabling scalable cloud-based hosting.

Book Store Website (React.js, Tailwind CSS)

- Created a responsive online bookstore with featured books and light/dark mode toggling functionality.
- Improved user experience by integrating scroll animations using the Animate On Scroll (AOS) library.

Food Store Website (React.js, Tailwind CSS)

- Developed a responsive online food store with an intuitive user interface, enhancing user experience and navigation.
- Implemented dynamic filtering options to display food items based on price and dish type.

Certifications & Achievements

MERN stack Certification

Croma campus (Dec-2024)

- Achieved MERN stack certification from Croma Campus, completing five full-stack projects and writing over 1200 lines of code, which enhanced skills in MongoDB, Express.js, React, and Node.js.

Programming in Java

NPTEL (Apr-2024)

- I achieved a score of 77%, placing me in the top 5% in the NPTEL certification course "Programming in Java", offered by IIT Kharapur.

Education

Lovely Professional University (Punjab)

2020 – 2024

Bachelor of Technology in Electronics & Communication Engineering

CGPA : 7.03

Higher Secondary(10+2)

CGPA : 9.25

Matriculation(10th)

CGPA : 9.3
